

When Proven Performance Really Matters.

Tensor H-50

- > 50,000 PPH
- > 1:2:2 cylinder geometry
- > Superior, precision folding accuracy
- > Easy changeover capabilities
- > Automatic adjusting jaws
- > Web capacity up to twelve webs, dependent on specific application
- > Crosshead, ring and notch-type spine perforators, double parallel capability and dual RTF options available
- > Enhanced quarter folder available for difficult SCA and SCB lightweight stocks and other high-speed commercial heatset applications
