

GT Impressiones, Mexico City Mexico

T460 Heatset press. 4 units: 1 H50 folder: 1 Gas dryer:

The tower comes standard with unit shaftless drive, eleven roller Ink train (including three ink form rollers), remote ink control including ink presetting and closed loop register. Other auxiliaries included with the press is a gas dryer, plow folder and ribbon deck for producing a 12 page tabloid or a 6 page broadsheet. The press was installed in 2015.

Al Anbaa, Kuwait City, Kuwait

Installation of the 28 new press units has begun and the press is expected to be fully commissioned this December 2014. The press consists of Tensor T-1400 press units, an H-50 folder and 10 splicers. One of the 4-high towers is equipped with UV. The press will be driven by a DCOS shaftless drive system and is also nicely equipped with remote inking and brush dampening.

Kuwait Times, Kuwait City Kuwait

Tensor installs a T400BE 4-high printing tower with UV curing system to Kuwait Times existing Manugraph press. The tower is integrated into the existing press with a shaftless drive and is equipped with EPG remote ink control. Kuwait Times needed to run LWC on page one of their newspaper and turned to Tensor for the solution. The tower was installed in 2015.

La Presse de la Manche, Cherbourg, France

T400 Newspaper press. 24 units and 1 H-50 folder.

La Societe Cherbourgeoise d'Editions who is a repeat customer of Tensor, added three Tensor T400 4-high printing towers onto their existing Solna press in 2010. This new order in 2013 includes two more 4- high towers and one H50 folder. The addition will be highly automated to match the existing equipment. La Societe Cherbourgeoise d'Editions, publisher of the daily paper La Presse de la Manche, will get a capacity of 64 pages with increased 4-color capacity to 48 pages.
